

Heart disease is rising among Chinese-Canadians. We need your help to find out why.

If you are a **Chinese-Canadian, aged 35 to 69**, living in the Greater Toronto Area, and willing to have an MRI scan at Sunnybrook Health Sciences Centre, we invite you to participate in the Alliance Chinese-Canadian Research Study.

All participants receive a personalized heart health risk report.

Contact us by **October 31, 2017**
