

MoCA

(Montreal Cognitive Assessment)

English

Administration and Scoring Instructions

The Montreal Cognitive Assessment (MoCA) was designed as a rapid screening instrument for mild cognitive dysfunction. It assesses different cognitive domains: attention and concentration, executive functions, memory, language, visuoconstructional skills, conceptual thinking calculations, and orientation. Time to administer the MoCA is approximately 10 minutes. The total possible score is 30 points; a score of 26 or above is considered normal

1. **Alternating Trail Making:**

Administration: The examiner instructs the subject: *"Please draw a line, going from a number to a letter in ascending order. Begin here [point to (1)] and draw a line from 1 then to A then to 2 and so on. End here [point to (E)]."*

Scoring: Using a stopwatch, record the time it takes to complete the task. Begin timing when the participant begins drawing the line from "2" to "B". If the subject makes an error that is not immediately self-corrected, point out the error and ask the subject to correct the error, while still timing. If the subject cannot determine which number or letter is next, despite repeating the above instructions, then show the subject which number or letter is next. The total time to complete the task will therefore include the time it takes to correct any errors. You may instruct the subject twice regarding errors. If the subject makes a third error, despite the instructions, then you should stop the subject and consider that the subject attempted but could not complete the task; check the box for "subject attempted but did not complete." If the subject is unable to complete the task within 90 seconds, stop the subject at 90 seconds and score the test as "subject attempted but did not complete" while recording the time as 90 seconds.

Record the time (in seconds) on the Case Report Form, as well as the number of errors that required correction (not including errors that were immediately self-corrected by the subject).

If the subject could not begin the task despite 3 attempts at providing instructions, check the box for "subject did not attempt" and leave the time in seconds as "00".

If the subject could not complete the task, either because the subject gave up, the subject made 3 errors and was stopped by the examiner, or the subject was stopped because the maximum of 90 seconds had elapsed, you should check the box for "subject attempted but did not complete".

If the subject did not complete the task because the maximum time had been reached, you should also record "90" as the time in seconds.

In addition to the recorded time, indicate if the subject successfully draws the following pattern: 1-A-2-B-C-4-D-5-E, without drawing any lines that cross. Any error that is not immediately self-corrected earns a score of 0 (zero). If the pattern is drawn without any errors then check the box marked, "Completed task without any errors" on the scoring sheet.

Alliance

2. Visuoconstructional Skills (Cube):

Administration: The examiner gives the following instructions, pointing to the cube

“Copy this drawing as accurately as you can, in the space below”.

Scoring: One point is allocated for a correctly executed drawing.

- Drawing must be three-dimensional
- All lines are drawn
- No line is added
- Lines are relatively parallel and their length is similar (rectangular prisms are accepted)

A point is not assigned if any of the above-criteria are not met.

3. Visuoconstructional Skills (Clock):

Administration: Indicate the right third of the space and give the following instructions:

“Draw a clock. Put in all the numbers and set the time to 10 after 11”

Scoring: One point is allocated for each of the following three criteria:

Contour (1 point.): the clock face must be a circle with only minor distortion acceptable (e.g., slight imperfection on closing the circle);

Numbers (1 pt.): all clock numbers must be present with no additional numbers; numbers must be in the correct order and placed in the approximate quadrants on the clock face; Roman numerals are acceptable; numbers can be placed outside the circle contour;

Hands (1 pt.): there must be two hands jointly indicating the correct time; the hour hand must be clearly shorter than the minute hand; hands must be centred within the clock face with their junction close to the clock centre.

A point is not assigned for a given element if any of the above-criteria are not met.

4. Naming:

Administration: Beginning on the left, point to each figure and say: *“Tell me the name of this animal”.*

Scoring: One point each is given for the following responses: (1) camel or dromedary, (2) lion, (3) rhinoceros or rhino.

5. Memory:

Administration: The examiner reads a list of 5 words at a rate of one per second, giving the following instructions:

“This is a memory test. I am going to read a list of words that you will have to remember now and later on.

Listen carefully. When I am through, tell me as many words as you can remember. It doesn't matter in what order you say them”. Mark a check in the allocated space for each word the subject produces on this first trial When the subject indicates that (s)he has finished (has recalled all words), or can recall no more words, read the list a second time with the following instructions: *“I am going to read the same list for a second time. Try to remember and tell me as many words as you can, including words you said the first time.”* Put a check in the allocated space for each word the subject recalls after the second trial. At the end of the second trial, inform the subject that (s)he will be asked to recall these words again by saying, *“I will ask you to recall those words again at the end of the test.”*

Scoring: No points are given for trials One and Two.

6. Attention:

Forward Digit Span: Administration: Give the following instruction: *“I am going to say some numbers and when I am through, you must repeat them to me in the backwards order.”* Read the three number sequence at a rate of one digit per second

Scoring: Allocate one point for each sequence correctly repeated, (N.B.: the correct response for the backwards trial is 2-4-7)

Alliance

6. Attention:

Forward Digit Span: Administration: Give the following instruction: *“I am going to say some numbers and when I am through, repeat them to me exactly as I said them”*. Read the five number sequence at a rate of one digit per second.

Backward Digit Span: Administration: Give the following instruction: *“Now I am going to say some more numbers, but when I am through you must repeat them to me in the backwards order.”* Read the three number sequence at a rate of one digit per second.

Scoring: Allocate one point for each sequence correctly repeated, (N.B.: the correct response for the backwards trial is 2-4-7).

Vigilance: Administration: The examiner reads the list of letters at a rate of one per second, after giving the following instruction: *I am going to read a sequence of letters. Every time I say the letter A, tap your hand once. If I say a different letter, do not tap your hand”*.

Scoring: Give one point if there is zero to one errors (an error is a tap on a wrong letter or failure to tap on letter A).

Serial 7s: Administration: The examiner gives the following instruction: *“Now, I will ask you to count by subtracting seven from 100, and then keep subtracting seven from your answer until I tell you to stop”*. Give this instruction twice if necessary.

Scoring: This item is scored out of 3 points. Give no (0) points for no correct subtraction, 2 points for two-to-three correct

of 7 beginning at 100. Each subtraction is evaluated independently; that is, if the participant responds with an incorrect number but continues to correctly subtract 7 from it, give a point for each correct subtraction. For example, a participant may respond “92 – 85 – 78 – 71 – 64” where the “92” is incorrect but all subsequent numbers are subtracted correctly. This is one error and the item would be given a score of 3.

7. Sentence repetition:

Administration: The examiner gives the following instructions: *“I am going to read you a sentence. Repeat it after me, exactly as I say it [pause]: I only know that John is the one to help today.”* Following the response, say: *“Now I am going to read you another sentence. Repeat it after me, exactly as I say it [pause]: The cat always hid under the couch when dogs are in the room”*

Scoring: Allocate 1 point for each sentence correctly repeated. Repetition must be exact. Be alert for errors that are omissions (e.g., omitting “only”, “always”) and substitutions/ additions (e.g., “John is the one who helped today, substituting “hides” for “hid”, altering plurals, etc).

8. Verbal fluency:

Administration: The examiner gives the following instruction: *“Tell me as many words as you can think of that begin with a certain letter of the alphabet that I will tell you in a moment. You can say any kind of word you want except for proper nouns (like Bob or Boston), numbers or words that begin with the same sound but have a different suffix, for example, love, lover, loving. I will tell you to stop after one minute. Are you ready? [Pause] Now, tell me as many words as you can think of that begin with the letter F. [time for 60 sec.] Stop”*.

Scoring: Allocate one point if the subject generates 11 words or more in 60 sec.

Record the subject’s response on the “Verbal Fluency Responses” form, in the appropriate time category (words generated in 0-15 seconds, 16-30 seconds, 31-45 seconds and 46-60 seconds). On the form, record the number of “F” responses in each time category.

9. Abstraction:

Administration: The examiner asks the subject to explain what each pair of words has in common, starting with the example: *“Tell me how an orange and a banana are alike”*. If the subject answers in a concrete manner, then say only one additional time: *“Tell me another way in which those items are alike”*. If the subject did not give an appropriate response (fruit), say and *they are also both fruit”*. Do not give any additional instructions or clarification. After the practice trial, say: *“Now tell me how a train and a bicycle are alike”*. Following the response administer the second trial, saying: *“Now tell me how a ruler and a watch are alike”*. Do not give any additional instructions or prompts.

Scoring: Only the last two item pairs are scored. Give 1 point to each item pair correctly answered. The following responses are acceptable:

Train-bicycle = means of transportation, means of travelling, you take trips in both;

Ruler-watch = measuring instruments, used to measure.

The following responses are not acceptable: Train-bicycle = they have wheels; Ruler-watch = they have numbers

Alliance

10. Delayed recall:

remember Make a check mark () for each of the words correctly recalled spontaneously without any cues, in the allocated space.

Scoring: Allocate 1 point for each word recalled freely without any cues.

Optional:

Following the delayed free recall trial, prompt the subject with the semantic category cue provided below for any word not recalled. Make a check mark in the allocated space if the subject remembered the word with the help of a category or multiple-choice cue. Prompt all non-recalled words in this manner. If the subject does not recall the word after the category cue, give him/her a multiple choice trial, using the following example instruction, "*Which of the following words do you think it was, NOSE, FACE, or HAND?*"

Use the following category and/or multiple-choice cues for each word, when appropriate:

FACE: category cue: part of the body multiple choice: nose, face, hand

VELVET: category cue: type of fabric multiple choice: denim, cotton, velvet

CHURCH: category cue: type of building multiple choice: church, school, hospital

DAISY: category cue: type of flower multiple choice: rose, daisy, tulip

RED: category cue: a colour multiple choice: red, blue, green

Scoring: No points are allocated for words recalled with a cue. A cue is used for clinical information purposes only and can give the test interpreter additional information about the type of memory disorder. For memory deficits due to retrieval failures, performance can be improved with a cue. For memory deficits due to encoding failures, performance does not improve with a cue.

11. Orientation:

Administration: The examiner gives the following instructions: "*Tell me the date today*". If the subject does not give a complete answer, then prompt accordingly by saying "*Tell me the year, month, exact date and day of the week*". Then say "*Now, tell me the name of this place and which city it is in*"

Scoring: Give one point for each item correctly answered. The subject must tell the exact date and the exact place (name of hospital, clinic, office). No points are allocated if subject makes an error of one day for the day and date.

TOTAL SCORE: Sum all subscores listed on the right-hand side. Add one point for an individual who has 12 years or fewer of formal education, for a possible maximum of 30 points. A final total score of 26 and above is considered normal.

Visuospatial/ Executive

Trail Making B
 Cube
 Clock - contour
 Clock - numbers
 Clock - hands

Naming

Lion
 Rhinoceros or Rhino
 Camel

Attention

Read list of digits (1 digit/ sec) Repeat digits in forward order **2 1 8 5 4**
 Repeat digits in backward order **7 4 2**

Read list of letters. The subject must tap with his hand at each letter A. No points if ≥ 2 errors

Serial 7 subtraction starting at 100 **93** **86** **79** **72** **65**
 (Scoring: 4 or 5 correct subtractions: 3 pts., 2 or 3 correct: 2 pts., 1 correct: 1 pt., 0 correct: 0 pt.)

Language

Repeat: I only know that John is the one to help today.
 The cat always hid under the couch when dogs were in the room.

Fluency: Name the maximum number of words in one minute that begin with the letter "F" (≥ 11 words: 1 point)

Abstraction

Similarity between e.g. banana - orange = fruit train - bicycle watch - ruler

Delayed recall

Has to recall words with NO CUE. **Face** **Velvet** **Church** **Daisy** **Red**
